PRODUCT DESCRIPTION

The all-new LOOK HM 12 D105 offers the ultimate in high-performance freeride touring and safety. Compatible only with pin-tech boots, the HM 12 utilizes a frameless design, weighs only 1270 g/pr and provides a 5-12 release value range, positioning itself as the most modern, performance-oriented freeride touring bindings on the market. A new pivoting, pin-tech toe-piece delivers increased elasticity to reduce unwanted pre-release for confident retention when pushing your boundaries, while the frameless design allows natural ski flex for enhanced ski-ability and downhill performance.

Rec. Ski Width: 90-105mm

MAIN TECHNOLOGY

HM

The LOOK HM is positioned as one of the most modern and relevant products on the market: - A moderate weight of 1,270 g/pair - Three brake widths to adapt to all types of skis - A heelpiece designed to maximize flex for excellent skiability - Enhanced elasticity to reduce the risk of unwanted pre-release

OTHER TECHNOLOGIES

LIGHT WEIGHT

LOOK designs lightweight bindings featuring the highest-levels of retention and release that make skiing and carrying your skis easier, without compromising on safety.

OPEN BINDING

Traditional screw-mounted bindings are compatible with any "flat" alpine ski on the market.

TÜV

All LOOK bindings are designed to give skiers maximum safety. TÜV Munich certifies our products, ensuring that they conform to safety standards and verifying that our assembly equipment and processes are capable of manufacturing them in accordance with international ISO standards.
